AI Trainer / Evaluation Specialist – Python generalist with sales-operations dep

Summary

Versatile Python developer and AI workflow builder with hands-on sales-operation s experience. I build automation pipelines (Python, APIs, CRM integrations), evaluate LLM outputs for factual accuracy and instruction-following, and translate messy real-world sales and revenue workflows into clean, testable processes.

Skills

Python 3 · automation/scripting · API integration · LLM prompt design & evaluation · data annotation & labeling · CRM/sales-ops (lead routing, pipeline hygiene, outreach ops) · QA and process documentation · technical writing

Experience

Founder – CallbackOps (AI Lead-Recovery Service) | 2025–Present – Built and operate an AI-powered lead-recovery service for home-service companies (HVAC, plumbing, electrical, roofing, appliance repair) across Southern California – Developed a Gemini-based lead-classification agent (0.95+ average confidence across a 12-case benchmark): intent/urgency classification, automated reply drafting, escalation routing – human-in-the-loop on every message – Own the full stack: Python automation, REST API integration, CRM workflows, cold-outreach operations (55-pr prospect pipeline), reporting – Ships production-quality docs, tests, and SOPs alongside code

Sales Operations & Automation Lead – Independent | 2024–2025 – Built lead intake, enrichment, and outreach-sequencing automation for small businesses; owned data quality end-to-end – Evaluated AI-generated sales messaging for accuracy, tone, and edge-case handling – Wrote and maintained playbooks, QA checklists, and process documentation

Selected Projects

Lead Recovery Agent (github.com/jtabsbm/lead-recovery-agent): multi-platform AI agent (Gemini SDK + REST fallback chain, local Ollama edition); 12/12 benchmark leads classified correctly; published as an open-source starter kit

LeadFinder Ops (OpenSearch skill): retrieval-layer CLI for missed-lead recovery – 6 unit tests + 8 end-to-end tests passing; accepted submission to OpenSearch Agent Skills hackathon (PR #116)

Education

Bachelor's-level coursework, business & information systems English: native. Available 30+ hrs/week, US-based, immediate start.
